This action is responsive to the communication filed June 23, 2003.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-45, drawn to an electrofluidic system, classified in class 137, subclass 884.
- II. Claims 46-65, drawn to a method of making an electrofluidic device, classified in class 216, subclass 20.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by an additive process, for example.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
